

Eye Care Seminar (English only)

时间 **Time:** 12/8/2012 2:00PM-3:00PM

地点 **Location:** CACC 图书馆 Library

1313 Little Baltimore Roads, Hockessin, Delaware 19707

演讲者 **Speaker:** Dr. Allan Tocker

主办方 **Host:** Delaware Chinese American Association (DCAA)

内容 **Topic:** Orthokeratology

Orthokeratology also referred to as Ortho-K, Overnight Vision Correction and Corneal Refractive Therapy, is the use of rigid gas-permeable contact lenses, normally worn only at night, to improve vision through the reshaping of the cornea. This method can be used as an alternative to eyeglasses, refractive surgery, or for those who prefer not to wear contact lenses during the day. It is a contact lens fitting technique designed to reduce or eliminate the progression of myopia in young people.

Dr. Allan Tocker

Dr. Tocker is an Optometrist, with 25 years of private practice in Wilmington. He specializes in contact lenses, treatment of eye disease and Dry Eye Disease. He has lectured and consulted with major contact lens manufacturers such as Johnson and Johnson, makers of Acuvue brand contacts and Bausch and Lomb, the first manufacturer of soft contacts lenses. He has also lectured/consulted with Alcon Pharmaceuticals a company that specializes in treatment for dry eye. Dr. Tocker provide eye care services to families and communities including
